CERTIFICATIONS

- Six Sigma Green Belt
ASQ South Asia.
- SQL Intermediate Level
Hackerrank

TECHNICAL SKILLS

- JavaScript
- SQL
- Node JS
- Git commands
- Java
- Groovy
- PL/SQL

SOFTWARE SKILLS

- Lean Six Sigma
- Postman
- JIRA
- Tableau
- IBM Cognos
- Dell Boomi

A full stack web developer with 7 years of experience in developing and integrating front-end and back-end based web applications. Specialized in Node.js and microservices architecture and expertise in multiple programming languages, frameworks and tools. Seeking to leverage my leadership and technical skills in a strategic role for a dynamic tech environment.

PROFESSIONAL SUMMARY

- Developed API's and backend services using Node.js to ensure system reliability and high test coverage
- Optimized implementation time of generating reports to 85% by enhancing and redeveloping ETL Processes
- Skilled in streamlining backend storage management using MySQL resulting in significant performance improvement
- Ownership in analyzing, developing and deploying new features into dataset from scratch
- Hands On experience in production level bug fixes to stabilize user experience
- Extensive knowledge and experience on creating PL/SQL script to perform data validations
- Experienced in building complex platform integrations using DELL Boomi
- Committed to quality of the product through rigorous end-to-end and performance testing ensuring robust and bug free application

SHAKTHIVEL

FULL STACK DEVELOPER

EXPERIENCE

● **2022 - Present**

ADP India Ltd.

Application Developer

- Created and optimized API's to fetch user specific details using **NodeJS** ensuring business requirement coverage.
- Optimized backend storage management using **MySQL** to reducing data retrieval time by 30%
- Create data transformation scripts using **GoLang** to convert JSON inputs to Arrays of objects.
- Designed and developed code documents to perform **CRUD functionalities** based on business requirements.
- Developed an **ETL process** to read, parse and validate user uploaded excel files against multiple criteria to implement automatic data insertion into multiple system tables.
- Integrate API's with Data contracts in **Lifion tool** which will fetch the necessary output to be displayed for specified UX page.
- Conduct End-to-End testing (UAT, Sandbox) and performance testing to enhance UX and API standards, resulting to 20% reduction in bugs.

● **2021 -2022**

Wolters Kluwer

Product Software Engineer

- Integrated **IBM Cognos Analytics** with passport application and developed Analytic reports with data's to provide insights and reports of each module with timeframe differences.
- Analyzed system flow and been a part of developing **E-Docketing system** to provide users with events that organizes day to day work based on priorities.
- Oversaw the development and maintenance of associates in the team by analyzing and approving the code changes and merging them with the master release.
- Assisted in providing high level and low level design and solutions for complex code development and conduct scrum meetings on creating development plans for each sprint.
- Planned and Developed a new **Full Stack Diversity Module** individually according to the Latest ABA guidelines which provides diversity data information to legal service users to support with providing diversity initiatives.

SHAKTHIVEL

FULL STACK DEVELOPER

EXPERIENCE

● 2020 - 2021

Wolters Kluwer

Associate Product Software Engineer

- Presented an idea and worked towards developers taking responsibilities of modules to mitigate the bugs and fixing them to improving the stability of the module.
- Develop functionality of resubmitting and adjusting invoice details based on fees or expenses incurred for appealing an invoice.
- Worked on AI based integration development (**Legal View Predictive Insights**) to perform automated selection of fields and rank the best firms based on selected criteria.
- Worked on end-to-end functionality of the product such as analyzing, planning, developing and testing the functionalities using **Java**.
- Worked on **production level bug fixes** for the clients to stabilize the user experience.
- Created automation scripts to perform end to end automation testing of every functionality which reduced product bugs from 70% to 40%.

● 2018 -2019

Logic Information Systems Ltd.

Associate Consultant

- Design process integrations to perform CSV to Database and Database to CSV conversion using **Dell Boomi**.
- Develop data conversions to get data's from multiple tables and join them to convert into XML formatted file using Dell Boomi
- Implemented **PL/SQL** scripts for maintaining data's in inventory management domain.
- Worked on Web application development using **Oracle ADF**.
- Create tables in SQL loader as part of database creation for integration.

EDUCATION

● 2014 - 2018

Bachelor of Engineering in Computer Science

Sri Venkateswara College of Engineering
